

AMAN RAJ

Full-Stack AI Engineer | MERN Stack | React Native | AI-Native Development | Enterprise ERP

Bhopal, MP | +91-9142459858 | raj117557@gmail.com | Open to Relocation

PROFESSIONAL SUMMARY

Final-year B.Tech (CSE) student and independent full-stack developer with 1.5+ years of hands-on experience delivering production-grade enterprise systems — solo, end-to-end. Specialized in building complex multi-panel ERP platforms, AI-native workflows, REST APIs, and hardware integrations (RFID, GPS, Geofencing). Experienced with LLM integration, RAG pipelines, prompt engineering, and agentic systems. Strong track record of translating business requirements into outcome-driven, production-ready solutions across finance, education, hospitality, and workforce management domains. Seeking to leverage full-stack AI engineering capabilities in a high-impact, client-facing role.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Python, C++, SQL
Frontend	React.js, React Native, Next.js, Angular (basic), TailwindCSS, HTML5, CSS3
Backend	Node.js, Express.js, REST APIs, JWT Auth, Socket.io, Role-Based Access Control (RBAC)
AI & LLM	LLM Integration, RAG Pipelines, Prompt Engineering, LangChain, Agentic Workflows, OpenAI API, Claude API, Embeddings, Vector Databases
Database	MongoDB, Mongoose, MySQL, Redis, Indexing & Query Optimization
Integrations	Razorpay Payment Gateway, WhatsApp Business API, GPS/RFID Hardware, Geofencing, Google OAuth
Cloud & DevOps	Git, GitHub, PM2, Nginx, Vercel, Render, Linux, CI/CD basics, AWS (learning)
Other	Prompt Engineering (PwC Certified), Cybersecurity, OOP, Agile delivery, Client management

EXPERIENCE

Independent Full-Stack Developer — Freelance

January 2023 – Present

Self-Employed | Client-Facing Enterprise Projects

Bhopal, India

- Designed, developed, and deployed 8+ production-grade enterprise systems — fully solo — covering ERP, workforce tracking, financial management, hospitality, and food & beverage domains.
- Built AI-native features including LLM-integrated query modules, automated report generation using RAG pipelines, and prompt-engineered workflows within existing production systems.
- Managed complete client delivery lifecycle: requirement gathering, system architecture, API design, frontend development, testing, deployment, and handover documentation.
- Delivered working prototypes and live demos to client stakeholders; translated complex business requirements into scalable, outcome-driven technical solutions.
- Applied RBAC, JWT authentication, secure API patterns, and production-level error handling across all systems — following secure-by-design principles.

PwC Launchpad Trainee

Feb 2025 – Jun 2025

PwC Acceleration Centre

- Selected from applicants nationwide for PwC's competitive Launchpad program focused on emerging technology skills.
- Completed certified training in Prompt Engineering, Cybersecurity, and Python Fundamentals — directly applicable to AI-native engineering roles.

Salesforce Developer — Agentblazer Champion Program

May 2025 – Jul 2025

SmartBridge Trailmix

- Completed 8-week virtual internship — finished Salesforce trailhead modules and hands-on agentic AI development tasks within the Salesforce ecosystem.

KEY PROJECTS

School ERP Platform — GPS Tracking + RFID Attendance + AI Query System

Tech: MERN Stack, React Native, Socket.io, LangChain, WhatsApp API, Razorpay, RFID/GPS Hardware

- Built a full-scale school management platform with 5 panels: Super Admin, School Admin, Teacher, Parent App (React Native), and Device Monitor — multi-tenant, multi-role architecture.
- Integrated RFID dual-stage student attendance with mismatch detection, automated parent alerts, and gate-wise entry/exit logging — connected to live hardware.
- Implemented GPS live tracking with geofencing, real-time location updates via Socket.io, location history playback, and SOS emergency alert routing.
- Built AI-native query module using RAG pipeline (LangChain + vector store) allowing school admins to query attendance and financial data in natural language.
- Integrated WhatsApp Business API for OTP authentication, fee payment alerts, and automated operational notifications; Razorpay for end-to-end fee payment flow.
- Delivered complete HR management, staff attendance, accounts/financial ledger, reconciliation, and reporting modules — production-ready with full UAT support.

Employee Attendance & Workforce Tracking ERP

Tech: MERN Stack, React Native, RFID, GPS, Geofencing, LLM Integration

- Built enterprise workforce platform with RFID-based attendance, GPS real-time tracking, and geofencing alerts for field staff — deployed for a live enterprise client.
- Full ERP covering payroll processing, salary management, leave management, accounts, and department-wise performance reporting.
- Integrated LLM-powered automated summary generation for monthly HR reports — reducing manual reporting effort by 80%.
- Real-time device monitoring dashboard with online/offline status, battery/signal indicators, and operational alerts for inactive devices.

Financial Institution Management System — Telecaller + HR + CRM

Tech: MERN Stack, RBAC, REST APIs, JWT Auth

- Built complete operations platform for a financial institution — Telecaller Panel, HR Panel, Office Admin Panel, and Client Management in a single unified platform.
- Implemented full Suspect → Prospect → Client lifecycle management with audit trail, activity logging, and role-based visibility controls.
- Integrated salary management, payroll processing, employee records, and compliance tracking — supporting 50+ active users simultaneously.

Food Delivery Platform — Multi-Vendor with Real-Time Tracking

Tech: MERN Stack, React Native, Socket.io, Razorpay

- End-to-end platform with Customer App (React Native), Vendor Management Panel, Delivery Agent App, and Admin Dashboard — integrated in real time via Socket.io.

- Razorpay payment integration with success/failure/pending handling; multi-vendor order routing with live delivery tracking.

AI-Native Agentic Workflow System — RAG + LangChain (In Progress)

Tech: Python, LangChain, LangGraph, OpenAI API, ChromaDB, FastAPI, React

- Building an agentic AI system with multi-step tool orchestration using LangGraph — capable of querying documents, executing conditional logic, and returning structured outputs.
- RAG pipeline using ChromaDB vector store + OpenAI embeddings for context-aware document Q&A with hallucination detection and guardrails.
- Designing prompt templates, structured outputs, and tool-calling patterns for production use — following responsible AI and secure-by-design practices.
- FastAPI backend with React frontend; includes AI quality monitoring, logging, and cost/latency optimization strategies.

EDUCATION

B.Tech — Computer Science Engineering (IoT, Cybersecurity & Blockchain) *Nov 2022 – May 2026 (Pursuing)*

Lakshmi Narain College of Technology, Bhopal

Madhya Pradesh

- Relevant coursework: Data Structures & Algorithms, Computer Networks, Operating Systems, Database Management, Cybersecurity, IoT Systems.
- Active in hackathons and competitive programming — TCS CodeVita Season 12 Global Rank 6403 (300,000+ participants).

Class 12th — ICSE Board

2020 – 2022

Motilal Nehru Public School, Jamshedpur

ACHIEVEMENTS & CERTIFICATIONS

- TCS CodeVita Season 12 — Global Rank 6403 out of 300,000+ participants (2024).
- CoCubes National Assessment — Score: 551.
- PwC Certified — Prompt Engineering, Cybersecurity, Python Fundamentals (2025).
- Salesforce Agentblazer Champion — Trailhead certified developer, agentic AI workflows (2025).
- Delivered 8+ production enterprise systems independently — including GPS/RFID hardware integrations and AI-native features.
